

LECLUYSE

*Rigid vinyl vertical slats with built-in
Microban antibacterial protection.*

Summary of harmonised JIS Z 2801 test method

- 1 | Grow up culture overnight in BHI broth. Centrifuge the culture, pour off supernatant and resuspend pellet in 9 ml of saline, then dilute this again by 1 in 10 in saline.
- 2 | Inoculate test surfaces with 0.1ml of this culture suspension, cover inoculated area with film, pressing down to ensure good contact.
- 3 | Samples can be sealed in plastic bags with damp tissue paper to ensure the cultures do not dry out over night.

BS EN ISO 9001 : 1994
No.FS11100
